# Charming NEW Hardy Garden Mums

Hardy Mums have become a universal favorite for the garden since the introduction of the earlier blooming varieties. They are among the most dependable flowers in the autumn garden, providing a riot of color from August until heavy frosts spoil their display.

We pride ourselves in keeping only the better varieties and in adding the newer introductions only after giving them a trial in our gardens. In that way we can assure our customers of having only the best Mums.

All our plants are grown in 2½-inch pots and are guaranteed to be healthy, disease-free, and true to name. All will bloom this year. All prices quoted in this list include transportation to your door. Shipments can be made from March 1 to the middle of June. Usually all orders will be shipped at the proper planting time for your locality, which is Tomato planting time or when you set out tender plants.
